Reference: FCC Docket Nos 96-45, 98-171, 90-571, 92-237, 99-200, 95-116, 98-170
and NSD File No. L-00-72.

Dear FCC:

I feel that raising the fees is unfair to those of us who use tracfone.
With no contract fees for the service it enables lower income users
such as, single parents, teenagers, and other low income people the
opportunity to purchase these phones for the security of knowing they
are able to call for help when needed.

If the need for increase is unavoidable, then charge the high usage users
such as corporate businesses. Here they have employees traveling around
using the cell phones to increase their profits, or charge the people who can
afford the monthly contract fees.

You must consider how wonderful the Tracfone service is to lower income users.
Shouldn't everyone be able to afford safety!

Thank you for your prompt attention to this matter. Please provide a written
response indicating the status/resolution of this matter.

Very truly yours,

Jodie Jacobs
